68.8% of men and 31.1% of women owned a dwelling either alone or jointly in 2010

For women in particular, asset ownership is a source of economic empowerment and provides protection in the case of marital dissolution or abandonment. There is increasing evidence that ownership of property by women has positive consequences for women's empowerment, nutritional and health outcomes, and children's schooling.

House ownership status, by sex (% of population age 15-49)

Male

31.2% do not own a house
56.5% own a house alone
11.9% own a house jointly
0.4% own a house both alone and jointly

Female

68.9% do not own a house
5.2% own a house alone
24.5% own a house jointly
1.5% own a house both alone and jointly
