25.5% of girls and 31% of boys complete lower secondary school in Mali as of 2017 data

The female rate in Mali is lower than both Sub-Saharan Africa and the low-income group. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Lower secondary completion rate, by sex (% of relevant age group)

Adult literacy in Mali is lower among women than among men (2020)

The gap in adult literacy between men and women, 18.4, is larger than the gap of the Sub-Saharan Africa aggregate, 12.7. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

Vulnerable employment for females has improved in Mali since 1991

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 92.6% and among men is 80.5% in Mali for 2022. The rate of vulnerable employment is higher for men and women in Mali compared to the average rate in Sub-Saharan Africa.

49.5% of men and 30.3% of women owned a dwelling either alone or jointly in 2018

For women in particular, asset ownership is a source of economic empowerment and provides protection in the case of marital dissolution or abandonment. There is increasing evidence that ownership of property by women has positive consequences for women's empowerment, nutritional and health outcomes, and children's schooling.

House ownership status, by sex (% of population age 15-49)

Male

50.5% do not own a house

30.1% own a house alone

15.7% own a house jointly

3.7% own a house both alone and jointly

Female

69.7% do not own a house

3.6% own a house alone

23.9% own a house jointly

2.9% own a house both alone and jointly
