## Vulnerable employment among women has remained nearly the same since 1991

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 10.7% and among men is 14.8% in the Netherlands for 2022. The rate of vulnerable employment is similar for men and women in the Netherlands compared to the average rate in Europe & Central Asia.
