46.8% of girls and 39.8% of boys complete lower secondary school in the Syrian Arab Republic as of 2022 data

The gap in lower secondary completion rate between boys and girls, 7, is larger than the gap of the Middle East & North Africa aggregate, 1.9. Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

Lower secondary completion rate, by sex (% of relevant age group)

Adult literacy in the Syrian Arab Republic is lower among women than among men (2014)

The adult female literacy rate in the Syrian Arab Republic is higher than in Middle East & North Africa. Adult literacy rate is the percentage of people ages 15 and above who can both read and write with understanding a short simple statement about their everyday life.

Vulnerable employment for females has improved in the Syrian Arab Republic since 1991

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 8.3% and among men is 40.4% in the Syrian Arab Republic for 2022. The rate of vulnerable employment is higher for men but lower for women in the Syrian Arab Republic compared to the average rate in Middle East & North Africa.
