Vulnerable employment for females has improved in Zimbabwe since 1991

Workers in vulnerable employment are the least likely to have formal work arrangements, social protection, and safety nets to guard against economic shocks; thus they are more likely to fall into poverty. Vulnerable employment among women is 68.1% and among men is 54.6% in Zimbabwe for 2022. The rate of vulnerable employment is lower for men and women in Zimbabwe compared to the average rate in Sub-Saharan Africa.

38.4% of men and 36.7% of women owned a dwelling either alone or jointly in 2015

For women in particular, asset ownership is a source of economic empowerment and provides protection in the case of marital dissolution or abandonment. There is increasing evidence that ownership of property by women has positive consequences for women's empowerment, nutritional and health outcomes, and children's schooling.
