43.3% of girls and 46.4% of boys complete lower secondary school in Sub-Saharan Africa as of 2021 data

While the trend across countries and regions shows more girls completing secondary school than boys, Sub-Saharan Africa is the only region in which the regional rate is higher for boys than for girls. It is also the only region, in which the lower secondary school completion rates are lower at the regional level than the global level, (girls: 77, boys: 76.3). Lower secondary education completion rate measures how many children have completed the last grade of lower secondary education regardless of age completed.

By the time they are 19 years old, roughly 1 in 4 adolescent girls from Sub-Saharan Africa who have been in a relationship will have ever been physically or sexually abused by a current or former partner

Lifetime intimate partner violence (IPV) measures the proportion of the female population who have ever experienced such violence at least once in their lifetime. IPV in the past year indicates how prevalent this violence still is in society today and is globally reported on as SDG indicator 5.2.1. In Sub-Saharan Africa, adolescent girls and young women are more at risk of experiencing IPV in the last 12 months than adult women.
